CAREER OBJECTIVES

To occupy a respectable IT position in an enterprise where I can contribute to its profitability and stability through the application of my knowledge and acquired experience.

SAMPLE PROJECT

RestAPI	: using C#, .Net 5, MediatR, Dapper, AutoMapper, MS SQL Server
Blazor Client-Server	: using C#, Blazor, RestApi, Syncfusion, Bootstrap, CSS, Azure Web App
IHDL Online Exam	: using C#, Asp.Net, MS SQL, Bootstrap, Multi-Language(English, Arabic & French)

PROJECTS COMPLETED

- ☑ **.Net Core API**
  Developing Language : .Net 5, MediaTr, Dapper, AutoMapper, CQRS
- ☑ **SQL Database Replication**
  Database : SQL Server 2016
- ☑ **SQL Database Failover Cluster**
  Operating System : Windows 2019 Data Center
  Database : SQL Server 2016
- ☑ **SQL Database Mirroring**
  Database : SQL Server 2016
- ☑ **Fleet Management System**
  Developing Language : Microsoft Visual Studio 2019, MVC ASP .Net
- ☑ **MENA Executive Dashboard**
  Developing Language : Microsoft Visual Studio 2019, Angular, C# .Net Core
- ☑ **ITDL Online Exam and Registration**
- ☑ **IHDL Online Exam and Registration**
- ☑ **Hospital Information Solution**
- ☑ **Point-of-Sale Solution**

CERTIFICATION

Web Development	JICA, Okinawa Japan	December 17, 2009
Introduction to Oracle 9i	Oracle University	August 21, 2003
Oracle 9i DBA Fundamentals 1	Oracle University	August 29, 2003
Oracle 9i Pl/SQL	Oracle University	October 10, 2003

TECHNICAL SKILLS

Developing Tools

Microsoft Visual Studio (Visual Basic, Visual C++,Visual C#)	20 years
ASP.Net, Core.Net, RestAPI, Soap, Bootstrap, Html, CSS	7 years
MVC, JavaScript, Ajax, Elmah, Swagger	4 years
Dapper, MediaTr, UnitOfWork, AutoMapper, Blazor, Razor	2 years
Microsoft Power BI, Tableau	1 years
MSTest Core, Selenium	2 years
Angular, TypeScript, NodeJS	2 years

Database

SQL Server (Failover Cluster, Mirroring, Replication, Database Tunning, Trigger, Store Procedure, Function	15 years
SSRS, SSIS, SSAS	5 years
Microsoft Azure, GCP	3 years
Oracle Database 9i, 10i, 11i	15 years
InterBase, Sybase, MySQL, MariaDB	5 years

Hardware

Computer (Desktop, Laptop, Thin Client, Server)	20 years
Router, Switch, Modem, VPN, Firewall	10 years
PABX, VoIP, IP-PBX, Wireless	5 years
CCTV, Network Storage, IP Camera, Access Control, RFID	15 years
Genesys Telephone System, PureConnect, Call Center	5 years

Technical Support

Working with presales, sales and customer	3 years

Operating System

Windows Server NT, 2000, 2003, 2008, 2012, 2016, 2019	10 years
- Active Directory, IIS, DHCP, DNS, Group Policy	
- VirtualBox, Hyper-V, Acronis	3 years

DBA & SOFTWARE DEVELOPER
MENA Assistance, Dubai UAE
March 2018 – Present
- ☑ Installing and upgrading the database server and application tools
- ☑ Allocating system storage and planning storage requirements for the database system
- ☑ Modifying the database structure, as necessary, from information given by application developers
- ☑ Enrolling users and maintaining system security
- ☑ Controlling and monitoring user access to the database
- ☑ Monitoring and optimizing the performance of the database
- ☑ Planning for backup and recovery of database information
- ☑ Maintaining integrity and performance of database
- ☑ Maintaining Database failover clustering, Database Mirroring and Database Replication
- ☑ Backing up and restoring databases
- ☑ Generating various reports by querying from database as per need
- ☑ Developing RestAPI, Windows Service and Web API

SOFTWARE DEVELOPER
Development Institute for Science and Computer (DISC), Dubai UAE
June 1, 2017 – February 28, 2018
- ☑ Collaborate with upper management to determine programming objectives
- ☑ Participate in development of new software applications
- ☑ Write code that supports these objectives and provides optimal functionality
- ☑ Edit and improve upon code in existing software programs and applications
- ☑ Design new programs and applications that will enhance our business
- ☑ Ensure code is error-free, readable, efficient, and logically organized for ease of access
- ☑ Aptly name variables and include code comments for future users
- ☑ Provide supplemental program instructions and diagrams for code in layman's terms
- ☑ Develop set systems and tasks for efficient coding processes
- ☑ Run extensive tests and trial runs to confirm proper functionality and desired results
- ☑ Operate debugging software and seek out root cause of error in coding or sequences
- ☑ Perform detailed, manual checks of code
- ☑ Troubleshoot errors effectively and efficiently
- ☑ Create, manage, and maintain coding databases

IT ENGINEER
Al Fahim Cement Industries LLC, Dubai UAE
April 8, 2015 to May 31, 2017
- ☑ Installation, repair and maintenance of all IT equipment, including Desktop, Laptop, Thin Client, Server, Switch, Indoor and Outdoor Router, Long Range (5-15km) Wireless Router, IP Phone and PABX with VoIP, security IP camera, recording and storage server
- ☑ Installation, repair, maintenance and administer network system, including Active Directory, Domain Controller, Network Storage, FTP, WEB Proxy, DNS, DHCP, File and Database Server;
- ☑ Designs program structures and logic, and writes computer application program using the most appropriate programming languages, techniques and instructions, which gives a high degree of processing efficiency and flexibility while conforming to the program specifications;
- ☑ Designs, develop and maintain logical structures of all database elements of major application systems, including systems under development, using MS SQL;
- ☑ Analyzes program objectives and function specified, and evaluates program components & processing flow;
- ☑ Document programs based on standards in order to facilitate program maintenance and improvement of the system;

INFORMATION TECHNOLOGY OFFICER II (Section Head)
National Health Insurance (Government), Philippines
March 01, 1999 to February 24, 2014

COMPUTER PROGRAMMER
National Power Corporation (Government), Philippines
August 28, 1995 to February 28, 1999
